DETAILED ACTION

Claim Objections

1. Claim 16 is objected to because of the following informality: it appears that "claim 13" (line 1) was intended to be --claim 15--, which change will be assumed for purposes of further consideration of the claim, hereinbelow. Appropriate correction (or clarification) is required.

Election/Restriction

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1-14, drawn to a method of processing a database query, classified in class 707, subclass 3.
 - II. Claims 15-16, drawn to a method of electronic shopping comprising presentation of an image or description of a sales item, classified in class 705, subclass 27.

3. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In this case, Invention I has separate utility from Invention II, such as for use in determining and setting a price for an item to be sold; and, Invention II has separate utility from Invention I, such as for use in generating referral commissions by referring buyers to other sellers offering items for which the buyers are looking to purchase. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. A telephone call was placed to Mr. Gregory S. Bernabeo (Reg. No. 44,032), attorney for applicant, on July 14, 2005, to discuss an oral election to the above restriction requirement, but the call did not result in an election being made.

6. Applicant is advised that the reply to this requirement, to be complete, *must* include an election of the invention to be examined, even if the requirement be traversed (37 CFR 1.143).
